

AUDIO RECORDING MEDIUM, METHODS FOR RECORDING DATA ON
AND REPRODUCING DATA FROM THE RECORDING MEDIUM, AND
RECORDING AND REPRODUCING APPARATUSES THEREFOR

Abstract of the Disclosure

5 An audio recording medium, methods for recording data on and reproducing data
from the audio recording medium, and recording and reproducing apparatuses
therefor

10 An audio recording medium, methods for recording data on and reproducing
data from the audio recording medium, and recording and reproducing apparatuses
therefor are provided. In the audio recording medium, audio data are recorded in a
plurality of tracks in predetermined write units, and identification data for indicating
the start position of each of the tracks, such as mute data, are recorded in write units
segregated from the predetermined write units of the audio data. Thus, if a mute
period is unnecessary, the mute data can be easily removed.
