

ABSTRACT

TARGET TRACKING METHODS AND APPARATUSES, ELECTRONIC DEVICES, AND STORAGE MEDIA

Embodiments of the present disclosure provide target tracking methods and apparatuses, electronic devices, and storage media. The method includes: obtaining features of a plurality of reference images of a target image; determining a plurality of initial predicted positions of a tracking target in the target image based on the features of the plurality of reference images; and determining a final position of the tracking target in the target image based on the plurality of initial predicted positions. The embodiments of the present disclosure can avoid the dependence of target tracking on reference images, thereby improving the robustness of target tracking.
