

CONTROL SYSTEM FOR AND CONTROL METHOD OF
AUTONOMOUS DRIVING VEHICLE

5

ABSTRACT OF THE DISCLOSURE

10 A control system for an autonomous driving vehicle
comprises an operation device configured to be operated
by a driver; a notification device configured to give
notification to the driver; and an electronic control
unit. Autonomous driving is performed. When the driver
operates the operation device during autonomous driving,
15 autonomous driving is terminated and vehicle driving is
switched to manual driving. Further, when the driver
should be requested to terminate autonomous driving
during autonomous driving, the notification device is
controlled to first notify a request for preparing for
20 manual driving to the driver and then notify a request
for terminating autonomous driving to the driver.
