Claims

1. A compound of formula (I) in the form of any one of its stereoisomers or a mixture thereof

(I)

wherein

R^1 and R^2 form together with the carbon atoms to which they are attached cyclopropyl or a double bond, or R^1 and R^2 are hydrogen; and

R^3 and R^4 form together with the carbon atom to which they are attached cyclopropyl, and the dotted lines together with the carbon-carbon bond forms a single bond; or

R^3 and R^4 are hydrogen, and one of the dotted lines together with the carbon-carbon bond forms a double bond.

2. A compound according to claim 1 wherein R1 and R2 and/or R3 and R4 form together with the carbon atom to which they are attached cyclopropyl.

3. A compound according to claim 2 wherein the compound is (1-methyl-2-((1,2,2-trimethylbicyclo[3.1.0]hexan-3-yl)methyl)cyclopropyl)-methyl acetate in the form of any one of its stereoisomers or a mixture thereof.

4. A compound according to claim 3 wherein the compound is (1-methyl-2-(((1*S*,3*R,5R*)-1,2,2-trimethylbicyclo[3.1.0]hexan-3-yl)methyl)cyclopropyl)-methyl acetate.

5. A fragrance composition comprising or consisting of
   a) at least one compound of formula (I) as defined in claim 1 or 2, and
   b) [1-methyl2-[(1,2,2-trimethylbicyclo[3.1.0]hex-3-yl)methyl]cyclopropyl]methanol in the form of any one of its stereoisomers or a mixture thereof.

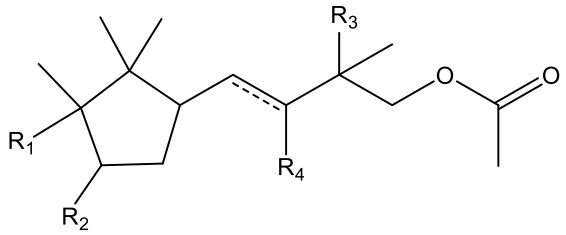

6. A fragrance composition according to claim 5, wherein the compound of formula (I) is (1-methyl-2-(((1*S*,3*R,5R*)-1,2,2-trimethylbicyclo[3.1.0]hexan-3-yl)methyl)cyclopropyl)-

methyl acetate (ingredient a)), and the ingredient b) is [1-methyl2-[((1S,3R,5R)-1,2,2-trimethylbicyclo[3.1.0]hex-3-yl)methyl]cyclopropyl]methanol.

7. A fragrance composition according to claim 5 or claim 6 which is characterized in that the weight ratio of the ingredients a) to b) is in the range from 0.05 : 99.95 to 5 : 95 (a : b).

8. A consumer product comprising a compound of formula (I) as defined in claim 1, or a fragrance composition as defined in claim 5, claim 6 or claim 7, and a consumer product base.

9. The use as fragrance of a compound of formula (I)

(I)

wherein

R^1 and R^2 form together with the carbon atoms to which they are attached cyclopropyl or a double bond, or R^1 and R^2 are hydrogen; and

R^3 and R^4 form together with the carbon atom to which they are attached cyclopropyl or a double bond, and the dotted lines together with the carbon-carbon bond forms a single bond; or

R^3 and R^4 are hydrogen, and one of the dotted lines together with the carbon-carbon bond forms a double bond.

10. A method of improving, enhancing or modifying a consumer product base by means of addition thereto of an olfactory acceptable amount of a compound of formula (I) as defined in claim 1, or a fragrance composition a defined in one of the claims 3 to 5.
