

Title of Invention:

DOCUMENT MANAGEMENT METHOD AND APPARATUS THEREFOR

ABSTRACT

5 A document management method and an apparatus therefor are disclosed. A user terminal obtains document content on a document to be stored in a document storage box, registers the document content in a document management apparatus, receives unique information from the document management apparatus, and inputs the unique information into a wireless tag located at one side of the document storage box in which the document is stored.

10 The document management apparatus maps the document content to unique information assigned to the wireless tag of the document storage box and stores and manages the same. In addition, when logging in with a user account licensed by the document management apparatus, user interface including a menu for editing or registering document content is provided to the user terminal, and when logging in with an unlicensed user account, user interface excluding

15 the menu so that editing or registration of document content is not possible is provided to the user terminal.
