(54) Title: A TRANSPARENT THERMOPLASTIC BLEND OF A CYCLOOLEFIN COPOLYMER AND A THERMOPLASTIC
POLYURETHANE

(57) Abstract: A blend of a cycloolefin copolymer and a thermoplastic urethane having similar indices of refraction is transparent. The cycloolefin copolymer is derived from norbornene and other monomers such that it has a processing range compatible with the thermoplastic urethane. The urethane component preferably has a polyether intermediate. A thermoplastic urethane compatibilizing agent is utilized desirably having a hydrocarbon intermediate portion. The compositions can be made to have desirable electrical dissipative properties for static control applications.
