(54) Title: MOIRÉ PATTERN DETECTION IN DIGITAL IMAGES AND A LIVENESS DETECTION SYSTEM THEREOF

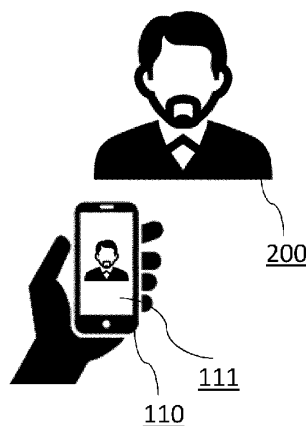

Fig.1

(57) Abstract: The present invention relates the detection of moire patterns in digital images, which is performed by processing a plurality of digital images of the captured subject and/or scene, each taken at a different image exposure and/or resolution. Furthermore, the present invention relates to a method and system for assessing liveness of captured biometric features based on the detection of moire patterns from the plurality of digital images.
