(54) Title: UNIVERSAL EPISTEMOLOGICAL MACHINE (A.K.A. ANDROID)

(57) Abstract

A universal epistemological machine (U.M.) enables arbitrary synthetic forms of existence (that is, thinking machines) known as androids, which know and perceive the world as do human beings. The U.M. embodies transformations of an extended existential universe of human being, and comprises means for transforming, representing, enbodying, translating and realizing a plurality of universal forms. These universal forms comprise universal objects in the form of physical embodiments of universal knowledge structures. The U.M. comprises a plurality of epistemic instances comprising the universal objects and universal transformations of those universal objects, expressed in a universal grammar, which allows all human knowledge to be enabling media for the U.M.
