(54) **Title:** METHOD AND PRINTER DRIVER UNIT FOR PERFORMING TRANSACTION BY AUTOMATICALLY TRANSMITTING DATA TO EDC TERMINAL

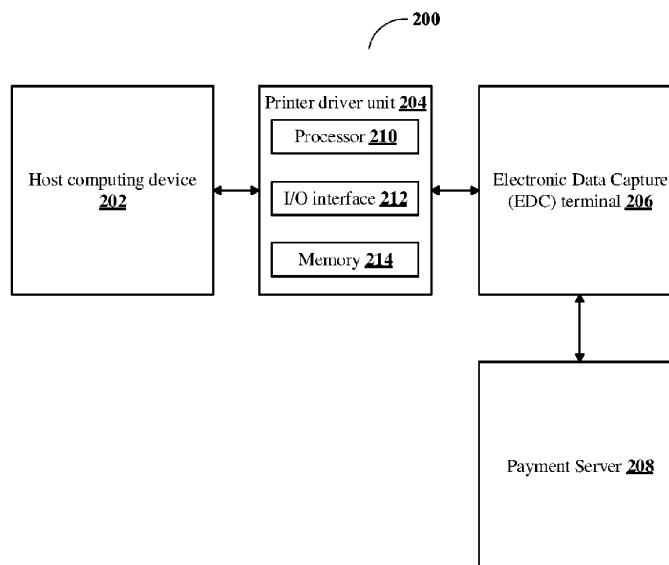

FIG. 2

(57) **Abstract:** The present disclosure is related to a printing driver unit, which discloses method and printer driver unit for performing a transaction by automatically transmitting data to an Electronic Data Capture (EDC) terminal. Method includes receiving, by printer driver unit associated with host computing device, first print request including first data related to purchase, from host computing device. Further, the printer driver unit extracts final transaction amount from first data and determines status of EDC terminal upon extracting final transaction amount. When EDC terminal is determined to be in first state, the printer driver unit generates a second print request including extracted final transaction amount and transmits the generated second print request to EDC terminal to facilitate automatic insertion of final transaction amount in EDC terminal to initiate payment transaction. Embodiments herein helps in auto -populating final transaction amount in EDC terminal, without the help of vendor specific billing system.
