(54) Title: COMBINATION WEDGE TAP CONNECTOR

(57) Abstract: An electrical connector assembly for a utility power transmission system includes a first conductive member having a first hook portion and a first base wedge portion with the first hook portion extending from the first wedge portion and is adapted to engage a main conductor. A second conductive member includes a hook portion and a wedge portion with the hook portion extending from the wedge portion and adapted to engage a tap conductor. The wedge portion of the first conductive member and the wedge portion of the second conductive member are adapted to nest with one another and be secured to one another by hand without specialized tooling.
