Title Of Invention: WASHING MACHINE

ABSTRACT

A washing machine includes a washing machine body, a water tub supported in an inside of the washing machine body and having a bottom with a drain port, and a heater unit disposed below the water tub and communicating with an inner bottom of the water tub. Further, the heater unit has heater container (37) that houses heater (38) for heating washing water inside and a plurality of water passages communicating the inner bottom of the water tub and heater container (37). The plurality of water passages is provided at positions where temperatures of the washing water are different in a state in which a power source of heater (38) is turned on.
