

METHOD AND APPARATUS FOR EVALUATING MULTIMEDIA QUALITY

ABSTRACT

The present invention discloses a method and an apparatus for evaluating multimedia quality.

5 The method includes: obtaining reference quality of a video and final quality of the video of a multimedia sequence, and reference quality of an audio and final quality of the audio of the multimedia sequence; determining reference quality of the multimedia sequence according to the reference quality of the video and the reference quality of the audio; determining a distortion value of the multimedia sequence according to the reference quality of the video, the final quality of the video, the reference quality of the audio, and the final quality of the audio; and determining multimedia quality of the multimedia sequence according to the reference quality of the multimedia sequence and the distortion value of the multimedia sequence. The method and apparatus for evaluating multimedia quality according to embodiments of the present invention can directly reflect distortion of a multimedia sequence, accord with a subjective feeling of a person, and

10 therefore can accurately and effectively evaluate the multimedia quality.
