

ABSTRACT**Method for carrying out an inventory of a plurality of biological containers and associated gantry**

The invention relates to a method for carrying out an inventory of a plurality of biological product containers (16), each container (16) and/or each package (14) comprising containers (16) being provided with an identification label comprising a wireless communication chip.

The method comprises the steps of:

- providing a device (12) comprising a gantry (26) defining a direction of travel (X),
- providing a receptacle (10) able to be moved, the receptacle (10) carrying the plurality of containers (16),
- moving the receptacle (10) in order to cross the gantry (26) in the direction of travel, and
- reading the wireless communication chip of each container and/or package (14, 16) during the movement of the receptacle (10).
