

Abstract

Guide rail (56A, 56b) for an escalator of a moving walkway, comprising at least one planar base surface (81, 81') with a guide surface (82, 82') for rollers (74), particularly for guide rollers of a step belt or plate belt (58) of an escalator or a moving walkway, and at least one guide strip (90, 90') with a guide flank for lateral guidance of these rollers (74), wherein the guide strip (90, 90') is a separate component.
