

ABSTRACT**CHITIN, HYDROLYSATE AND METHOD FOR THE PRODUCTION OF ONE OR
MORE PRODUCTS OF INTEREST FROM INSECTS BY MEANS OF ENZYMATIC
HYDROLYSIS**

The invention relates to chitin, a hydrolysate and a method for the production of at least one desired product from insects. More specifically, the invention relates to a method for the production of at least one desired product from insects, comprising an insect cuticle pressing step, followed by the enzymatic hydrolysis of the insect cuticles using a proteolytic enzyme.
