

## ABSTRACT

## INSPECTION SYSTEM, INSPECTING DEVICE AND GAMING CHIP

5        An inspection system inspects gaming chips each having a  
color or a display indicating a value on an outer surface in  
a state where the gaming chips are stored in a case in which  
a maximum of the number of gaming chips to be stored is  
limited, and a radio tag storing gaming chip information is  
10 embedded in each of the gaming chips. The gaming chips are  
stored in the case capable of containing a row of gaming  
chips stacked in a thickness direction, and the inspection  
system includes a reading device that reads the radio tag of  
the gaming chip in the case and acquires gaming chip  
15 information of the gaming chip and a determining unit that  
compares the gaming chip information with a maximum of the  
number of gaming chips storable in the case and determines an  
abnormality of the gaming chip in the case when the number of  
gaming chips obtained from the gaming chip information is  
20 different from a maximum of the number of storable gaming  
chips.
