

COSMETIC DEVICE

ABSTRACT

5 A cosmetic device 1 includes a main body 10, at least
four support shafts 40a to 40d, rollers 20a to 20d, and a
handle 11. The support shafts 40a to 40d are supported by
the main body 10, extending from the main body 10 so as to
go away from each other. The rollers 20a to 20d are
10 supported by the support shafts 40a to 40d so as to be
rotatable about axis lines La to Ld of the support shaft
40a to 40d, respectively.
