(54) Title: CONDITION ANALYSIS

(57) Abstract: The present invention provides a method of determining a treatment program for a subject. The method includes obtaining subject data representing the subject's condition. The subject data is used together with a model of the condition, to determine system values representing the condition. These system values are then used to determining one or more trajectories representing the progression of the condition in accordance with the model. From this, it is possible to determine a treatment program in accordance with the determined trajectories.

WO 2004/027674 A1

European patent (AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HU, IE, IT, LU, MC, NL, PT, RO, SE, SI, SK, TR), OAPI patent (BF, BJ, CF, CG, CI, CM, GA, GN, GQ, GW, ML, MR, NE, SN, TD, TG).
