

ABSTRACT

COMBINED FAN BLADE STRUCTURE AND AIR OUTLET DEVICE

A combined fan blade structure and an air outlet device are disclosed. The combined fan blade structure (100) includes: an inner hub (110), an outer hub (120), a first blade set (130), and a second blade set (140). The outer hub (120) and the inner hub (110) are coaxially arranged, the first blade set (130) is connected to an outer peripheral surface of the outer hub (120), the second blade set (140) is located between the inner hub (110) and the outer hub (120), and the outer hub (120) blocks the second blade set (140). By means of the combined fan blade structure, the air outlet volume and efficiency of the fan can be improved.
