

ABSTRACT

Embodiment of the disclosure relates to a method, apparatus, device, and storage medium for media resource generation. The method provided herein includes: displaying a resource search page comprising
5 a search control, the resource search page being configured to provide a resource search result corresponding to received input information; receiving a search term via the search control; providing, in the resource search page, a generation entry in association with the search control; and based on a selection of the generation entry, displaying, in the resource search page, a set of media resources generated based on the search term. In this way, the embodiments of the disclosure may provide users
10 with more diversified media resources to meet user specific needs for media resources.
