[Designation of Document] Claims

【Claim 1】

A hair cosmetic composition comprising a plurality of agents to be mixed and foamed by shaking,

wherein the plurality of agents include an alkaline agent and an acidic agent containing one or more anionic polymers selected from acrylic polymers, and any one or more of the plurality of agents contains alkyl (8 - 16) glucosides, and the mixture of the plurality of agents is alkaline.

【Claim 2】

The hair cosmetic composition according to claim 1 which is characterized in that the acidic agent contains one or more anionic surfactants.

【Claim 3】

The hair cosmetic composition according to claim 1 which is characterized in that the plurality of agents include an agent containing one or more polyether-modified silicones.

【Claim 4】

The hair cosmetic composition according to claim 3 which is characterized in that the plurality of agents include an agent containing a higher alcohol and that the one or more polyether-modified silicones are contained in the agent containing the higher alcohol.

【Claim 5】

The hair cosmetic composition according to any one of claims 1 to 4 which is characterized in that the acidic agent contains one or more non-ionic surfactants having HLB of 10 or more.
