(54) Title: METHOD FOR IMMOBILIZATION OF PROTEINS

(57) Abstract: The present invention relates to a method of producing a composition, the composition comprising a solid carrier, a protein or a fragment thereof immobilized on the surface of the solid carrier, a protective layer to protect the protein or a fragment thereof by embedding the protein or a fragment thereof, and optionally a functional constituent immobilized on the surface of the protective layer, wherein the functional constituent immobilized on the surface of the protective layer is a polymer comprising repeat units wherein each repeat unit comprises at least one amino group and/or at least one thiol group. The present invention also relates to the composition obtainable by the method.
