(54) Title: THE USE OF HONEY IN WOUND DRESSINGS

(57) Abstract: A method of manufacturing a dressing (1) which incorporates a honey composition (7) and a base material (2) is disclosed. The method includes the steps of preparing the honey composition (7) and of the base material (2), characterised by a change in the physical characteristics of the base material (2). The dressing (1) may include additional agents (3) either in the honey composition (7) or the base material (7) or both. The dressing can include further layers for adhesion; be covered with a waxed material and packaged. The dressing can be applied to a wide range of wounds including exudated and/or infected wounds.
