

ABSTRACT

This application discloses an information control method and apparatus and a base station. The information control method applied to a base station includes: transmitting first signaling from a CU of the base station to a DU of the base station, where the first signaling includes information about MBS traffic, and the information about MBS traffic is used to indicate the DU that the MBS traffic is to be transmitted in a first mode; generating configuration information related to the MBS traffic in the DU; and transmitting the configuration information from the DU to the CU.
