

ABSTRACT

To provide an air purifier with which it is possible to reduce production cost. An air purifier 1 provided with a casing 2 in which an inlet 3 and outlets 4 and 5 open, an air channel 8 connecting the inlet 3 and the outlets 4 and 5, a fan 10 disposed in the air channel 8, a pre-filter 6 disposed so as to face the inlet 3, and a cleaning device 30 for cleaning the pre-filter 6, wherein the cleaning device 30 has a feed roll 40 on which the sheet-shaped pre-filter 6 is wound, a winding roll 50 for winding the pre-filter 6, a drive motor 100 for rotatably driving the winding roll 50, and a brush body 80 linked to the drive motor 100 to rotate and slide on the pre-filter 6 on the winding roll 50 when the winding roll 50 rotates.
