Claims:

1. A flavour composition comprising:
   from 0.01% to 25% by weight of a characterizing flavour; and
   a taste modifying composition including at least four non-polar amino acids selected from the group consisting of glycine, alanine, valine, proline, leucine, isoleucine, methionine, proline, phenylalanine, and tryptophan, and at least one polar amino acid selected from the group consisting of tyrosine, serine, threonine, cysteine, glutamine, asparagine, aspartic acid, glutamic acid, lysine, histidine and arginine and mixtures thereof;
   wherein the at least four non-polar amino acids are present in equal molar concentrations.

2. The composition according to claim 1, further comprising at least five non-polar amino acids.

3. The composition according to claim 1, further comprising at least six non-polar amino acids.

4. The composition according to claim 1, wherein the at least one polar amino acid is aspartic acid or glutamic acid.

5. The composition according to claim 1, wherein the flavour composition includes from 0.1% to 6% by weight of the taste modifying composition.

6. The composition according to claim 5, wherein the taste modifying composition includes from 60% to 99% by weight of the at least four non-polar amino acids.

7. The composition according to claim 5, wherein the taste modifying composition includes from 1% to 40% by weight of the at least one polar amino acid.

8. A consumable comprising the flavour composition according to claim 1.

9. The composition according to claim 1, wherein the flavour composition is in the form of a powder.
