(54) Title: A RECLINER

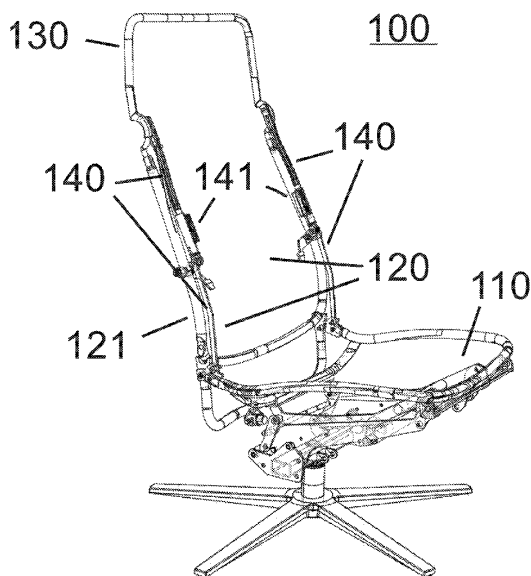

Figure 1

(57) Abstract: The present invention relates to a recliner (100) comprising a seat (110), a back (120) comprising a first back portion (121), a headrest (130) and an elongated connector assembly (140), where the back (120) is connected to the seat (110), the first back portion (121) is configured to pivot between an upright first position and a reclined second position, the headrest (130) is connected to the first back portion (121) and configured to pivot between a headrest first position and a headrest second position, the elongated connector assembly (140) is connected to the headrest (130) at a first connection point (150) and extending towards the seat (110), the elongated connector assembly (140) is configured to pivot the headrest (130) when the first back portion (121) is pivoted between the upright first position and the reclined second position, and where the elongated connector assembly (140) is having an adjustable length.
