(54) Title: MEDICAL IMPLANT APPARATUS WITH WIRELESS ENERGY TRANSMISSION

(57) Abstract: A medical implant apparatus include or use an energy transmission means for wireless transmission of energy of a first form from outside a patient's body. An implanted medical device is operable in response to energy of a second form different than the energy of the first form. An implanted energy transforming means transforms energy of the first form wirelessly transmitted by the energy transmission means into energy of the second form for use in the control and operation of the medical device.
