(54) Title: A CAR DEALERSHIP SYSTEM AND METHOD

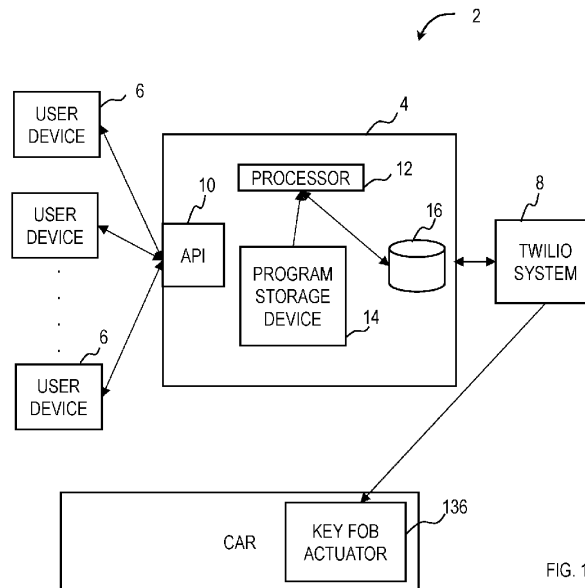

FIG. 1

(57) Abstract: A car dealership system is disclosed. The system includes a database configurable to maintain a record for each of a number of cars for sale. The cars are located at different geographical sites and each record includes a geographic location of a corresponding one of the cars. The system further includes a server. The server is operable to retrieve one or more records from the database and provide a user device with the one or more retrieved records. The server is further operable to receive information from the user device indicating interest in viewing one or more cars corresponding to the one or more retrieved records and send an instruction remotely to an unlocking device located within or in the proximity of the one or more cars to automatically unlock the one or more cars. A method of dealing in cars is also disclosed.
