

ABSTRACT OF THE DISCLOSURE

CLEANSING COMPOSITION CONTAINED IN FOAMER CONTAINER

The object of the present invention is to provide a cleansing composition contained in a foamer container which has a creamy quality and consistency, excels in low-temperature storage stability in spite of including a surfactant having a Krafft point of 20°C or more and gives moist skin texture after cleansing with it. For this end, the present invention provides a cleansing composition contained in a foamer container which includes a N-acylamino acid anionic surfactant (A), an anionic surfactant having a Krafft point of 20°C or more (B) other than the N-acylamino acid anionic surfactant (A), at least one compound selected from amphoteric surfactants and semi-polar surfactants (C), and a polyvalent alcohol (D) in a content of 22% by mass to 50% by mass relative to the cleansing composition, and the cleansing composition is included in a foamer container.
