

ABSTRACT

COMPONENT OF PRINTED CIRCUIT BOARDS

A component for use in manufacturing articles such as printed circuit boards and a method of making the same. The article comprising a laminate (30) of a sheet (C) of, for example, copper in face to face contact with a substrate sheet (A) of, for example, aluminium. The sheets being joined together by a band of flexible adhesive (40) which surrounds a central zone (CZ) which is substantially uncontaminated. FIGURE 2
