(54) Title: COMBINED SEAWATER AND FIREWATER SYSTEM

(57) Abstract: A combined seawater and firewater system, characterised in that the system comprises two or more pumping stations (2), the pumping stations each comprising two or more pumps (3), where each pumping station (2) is connected to a separate distribution header (7) for distribution of seawater and firewater, where essential consumers, such as generator cooling, thruster cooling and firewater monitors, are connected to two or more separate distribution headers (7), and non-essential consumers are connected to one of the distribution headers (7).
