(54) Title: SYSTEMS AND METHODS FOR FACILITATING PARTICIPATION IN CARD GAMES

(57) Abstract: A gaming system for facilitating participation in a card game by a player located remotely from a dealer of the card game is disclosed. The gaming system may include a dealer system, which may include a scanner for capturing electronic information representing a remote playing card dealt by the dealer. Additionally, the dealer system may include a first communications module for transmitting the information to one or more player systems. The gaming system may also include a player system, which may include a second communications module for receiving the information. Additionally, the player system may include a printing mechanism for (i) printing the information to a face of a local playing card and (ii) outputting the printed local playing card to a flipping mechanism. The player system may also include a flipping mechanism for selectively dealing the printed local playing card to the player either face up or face down.
