

ABSTRACT OF THE DISCLOSURE

BEETLE POWDER AND METHOD FOR REARING BEETLES COMPRISING AN
ULTRAVIOLET TREATMENT FOR PREPARING SUCH A POWDER

5

The present invention relates to: - on one hand, a beetle powder including a percentage by weight of vitamin D3 greater than or equal to at least 0.00001% and a percentage by weight of calcium greater than or equal to at least 0.1%, the percentages by weight being given on the total weight of beetle powder, and – on the other, a method for rearing beetles for preparing such a powder, which includes a light treatment phase during which a UV source emits ultraviolet rays towards the beetles.
