

SWITCH APPARATUS

ABSTRACT

Provided is a switch apparatus, comprising: at least one switch module (2), each of the switch modules (2) being capable of being connected to an operating circuit so as to control the on/off of same; and an operating panel (3), the operating panel (3) being capable of being driven to respectively operate each of the switch modules (2). An indication block (4) is detachably mounted between each of the switch modules (2) and the operating panel (3), the indication block (4) indicating the function of each of the switch modules (2). The switch apparatus is convenient for replacing an indication marker and has an attractive appearance.
