

ABSTRACT

5 A corrosive-gas-mixture-filled container includes a sealed container, and a gas filled in the sealed container and containing a corrosive gas. In the corrosive-gas-mixture-filled container, a concentration of water in a vapor phase in the gas is 400 mol ppm or less, the sealed container includes a cylindrical body portion including a metal layer having an inner surface in contact with a corrosive gas mixture, and a maximum height of a surface roughness of the inner surface of the metal layer of the cylindrical body portion is 50 μm or less.
