(54) **Title:** METHOD AND APPARATUS FOR OIL AND GAS OPERATIONS

(57) **Abstract:** An apparatus and system for accessing a flow system (such as a subsea tree) in a subsea oil and gas production system, and method of use. The apparatus comprises a body 4 defining a conduit therethrough and a first connector for connecting the body to the flow system. A second connector is configured for connecting the body to an intervention 6 apparatus, such as an injection or sampling equipment. In use, the conduit provides an 7 intervention path from the intervention apparatus to the flow system. Aspects of the 8 invention relate to combined injection and sampling units, and have particular application 9 to well scale squeeze operations.
