Claims

[Claim 1] An injectable composition comprising:

a pharmaceutically acceptable salt of a compound represented by the following Formula 1; and

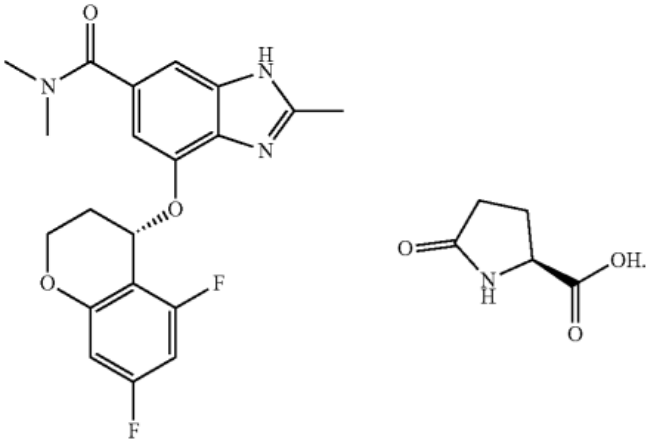

at least one stabilizing agent selected from the group consisting of mannitol, trehalose, lactose and glucose:

[Formula 1]

[Claim 2] The injectable composition according to claim 1, wherein the pharmaceutically acceptable salt of the compound represented by Formula 1 is a compound represented by the following Formula 2:

[Formula 2]

[Claim 3] The injectable composition according to claim 1, wherein the stabilizing agent is mannitol or trehalose.

[Claim 4] The injectable composition according to claim 1, wherein the stabilizing agent is present in an amount of 0.5 to 3.0 parts by weight with respect to 1 part by weight of the pharmaceutically acceptable salt of the compound represented by Formula 1.

[Claim 5] The injectable composition according to claim 1, wherein the pH of the injectable composition ranges from 3.0 to 5.0.

[Claim 6] The injectable composition according to claim 1, wherein the injectable composition is in the form of liquid or dried powder.

[Claim 7] The injectable composition according to claim 1, wherein the injectable composition further comprises at least one ingredient selected from the group consisting of an isotonic agent, a buffer solution, an osmotic agent and a pH-controlling agent.

[Claim 8] The injectable composition according to claim 2, wherein the stabilizing agent is mannitol or trehalose.

[Claim 9] The injectable composition according to claim 2, wherein the stabilizing agent is present in an amount of 0.5 to 3.0 parts by weight with respect to 1 part by weight of the pharmaceutically acceptable salt of the compound represented by Formula 1.

[Claim 10] The injectable composition according to claim 2, wherein the pH of the injectable composition ranges from 3.0 to 5.0.

[Claim 11] The injectable composition according to claim 2, wherein the injectable composition is in the form of liquid or dried powder.

[Claim 12] The injectable composition according to claim 2, wherein the injectable composition further comprises at least one ingredient selected from the group consisting of an isotonic agent, a buffer solution, an osmotic agent and a pH-controlling agent.
