PHARMACEUTICAL COMPOSITIONS FOR TREATING VIRAL INFECTIONS

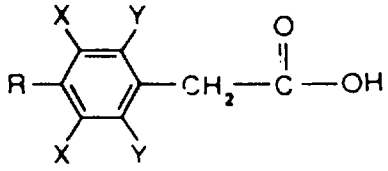

ABSTRACT

The present invention provides methods of manufacturing pharmaceutical compositions useful for treating viral diseases in humans said pharmaceutical compositions containing a therapeutically effective amount of a combination of

(A)

and

(B)

in a weight ratio ranging from about 1:1 to about 1:10 (A:B);

wherein R is OH, NH_2, OW, or H;

X is H, F, C1, Br, I, OH, OW, NO_2, or NH_2;

Y is H, F, C1, Br, or I;

W is C-Z or a C_1 to C_{12} aliphatic group;

O

Z is an aliphatic or aromatic group of C_1 to C_{12};

X and Y can both vary within the compound; or

pharmaceutically acceptable salts thereof.
