(54) Title: INBOUND ROAMER CALL CONTROL SYSTEM

(57) Abstract: A system for implementing call control services for an inbound roamer is provided. The system includes a control node to implement the call control services in response to an initiation request. The system further includes a service node to send a terminating customized applications for mobile network enhanced logic subscription information (T-CSI) for a called number in response to a routing request for the called number. The T-CSI contains an address pointing to the control node. The system further includes a switching center to send the routing request for the called number. The called number is present in a call received from the inbound roamer.
