(54) Title: IMPROVEMENTS IN, OR RELATING TO, MULTI CURRENCY PRICING AND NETWORK TRANSACTION SERVICES

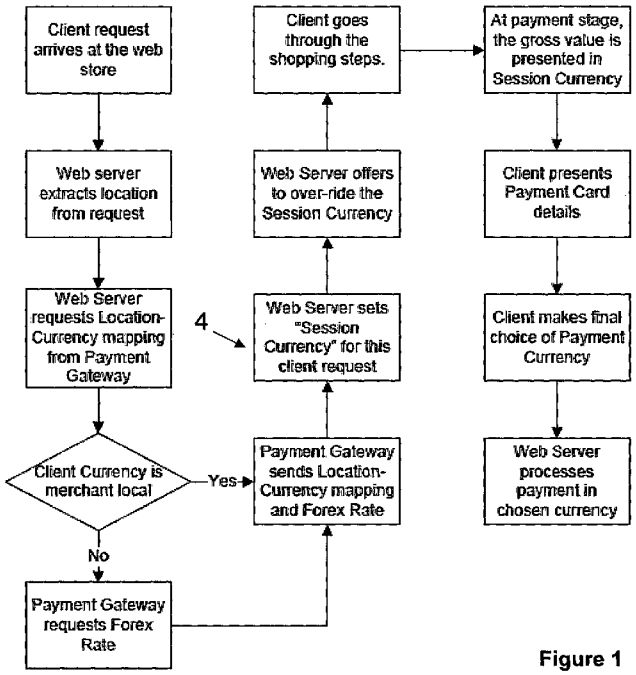

Figure 1

(57) Abstract: A method of multi-currency pricing over a network, comprising or including the steps of providing information to a first computer device in a first geographic location connected to said network, obtaining identifying data of said first computer device, detecting said first geographic location of said first computer device from said identifying data, choosing a first currency based on said first geographic location, calculating an equivalent in said first currency to at least one price in said information, wherein said information provided to said first computer device is in said first currency, which is the local currency of said first geographic location.
