[Document Name] Claims

[Claim 1]

A fishing reel comprising:

a reel body;

a handle that is rotatably supported on the reel body;

a drive shaft that is rotated by rotating operation of the handle;

a one-way clutch that is disposed on the drive shaft and includes an inner ring, an outer ring and a retainer retaining a plurality of rolling members;

a cylinder portion that is formed on the reel body and houses the one-way clutch; wherein

the outer ring is provided with a detent protruding radially outwardly;

the cylinder portion is provided with a notch that radially penetrates its circumferential wall, and the detent is disposed in the notch; and

a corrosion-resistant plate with a foot disposed between the detent and the notch is placed over the one-way clutch in an axial direction.

[Claim 2]

The fishing reel according to claim 1, wherein a circumferential wall is provided with two or more of the notches that are formed at equal intervals in the circumferential direction, and the detents are provided in a same number as that of the notches.

[Claim 3]

The fishing reel according to claim 1 or 2, wherein the outer ring is disposed with a gap formed between the outer ring and the circumferential wall of the cylinder portion.

[Claim 4]

The fishing reel according to any one of claims 1 to 3, wherein the corrosion-resistant plate is an anodized aluminum alloy.
