

RECORDING AND/OR REPRODUCING APPARATUS, RECORDING AND/OR REPRODUCING METHOD AND INFORMATION STORAGE MEDIUM THEREFOR

ABSTRACT

An apparatus for obtaining recording related parameters appropriate to recording characteristics of the apparatus is provided. The apparatus provided includes a pickup which emits or receives a light to transfer data with respect to the optical recording medium, and a controller which controls the pickup to search at least one disk information structure recorded on the recording medium, selects a desired disk information structure corresponding to the recording characteristics from the at least one disk information structure using information on recording characteristics included in the at least one disk information structure, and controls the pickup to read recording related parameters from the selected disk information structure.
