(54) Title: CONTAINER FOR BEVERAGE

(57) Abstract: A container, provided with an inner space (4) and a dispensing valve (3), wherein in the inner space a gas-containing beverage such as beer (B) is included, wherein a pressure control unit (6) is arranged for automatically controlling pressure in the inner space, wherein around the dispensing valve (3) first coupling means (10) extend, furthermore comprising a dispensing line (13) which at an end is provided with a coupling element (12) which is provided with second coupling means (14) for cooperation with the first coupling means, wherein the dispensing valve is a female valve, and the coupling element is provided with a largely hollow stem (15) with an end (28) and at least one opening (23), wherein the dispensing line links up with the stem opposite said end, such that in coupled condition of the coupling means the stem extends against or into the valve and has brought the valve into and keeps it in an opened position, such that beverage can flow via the valve and said at least one opening into the dispensing line.
