(54) Title: CONTROLLING AND MANAGING ACCESS TO MULTIPLE NETWORKS

(57) Abstract: The disclosure is directed to a mobile communication device, and method for registering with a network from a mobile communications device. A processor in the mobile device may be used to establish a network connection with a server in a network. The mobile device may also include a transceiver that receives information from the server relating to the network connection. The processor may use the information, local measurements, or both to determine whether to register with the network.
