(54) Title: INFORMATION PROCESSING DEVICE, PROGRAM INSTALLATION SUPPORT METHOD, AND COMPUTER-READABLE RECORDING MEDIUM

FIG.7

(57) Abstract: An information processing device performs communications via a network with a management device storing dependency information indicating a dependency relationship between programs. The information processing device includes a sending unit that sends, to the management device, identification information of a program to be downloaded; a receiving unit that receives, from the management device, install possibility information indicating whether the program to be downloaded can be installed in the information processing device, the install possibility information being determined based on the dependency information; and a display control unit that causes a display unit to display a screen page indicating whether the program to be downloaded can be installed in the information processing device based on the install possibility information, before downloading the program to be downloaded.
