(54) Title: A METHOD OF VERIFYING ORIGINATOR OR BENEFICIARY AND AN ELECTRONIC DEVICE PERFORMING THEREOF

(57) Abstract: A method of verifying a beneficiary is provided. The method may include identifying information regarding transfer of a virtual asset including full name data of an originator, date of birth (DOB) data of the originator and a beneficiary virtual asset address, identifying a hash value set of a full name of the originator generated based on the full name data of the originator and a hash value set of a DOB of the originator generated based on the DOB data of the originator, transmitting, to a beneficiary server, a verification request message including the hash value set of the full name of the originator, the hash value set of the DOB of the originator and the beneficiary virtual asset address, and receiving, from the beneficiary server, a response message including verification result information regarding whether the originator matches the beneficiary, which is generated based on the verification request message.
