(54) Title: BOTTLE CARRYING ARRANGEMENT

(57) Abstract

There is provided a paperboard device made from a blank (10) having two base panels (15, 16) for connection together, two side walls (20, 21), two top panels (22, 23), and two handle panels (24, 25) which are hingedly connected together by fold (26). The top panels (22, 23) have apertures (28) for receiving necks of bottles to be retained by the device. The top panels also have flap sections (34), one of which has a tab (35) which, in use, extends through one of the apertures (28) in the other top panel (23) and is bent up and retained there by the neck of the bottle in that aperture.
