(54) Title: METHOD FOR CONNECTING A MOBILE DEVICE TO A PERIPHERAL DEVICE

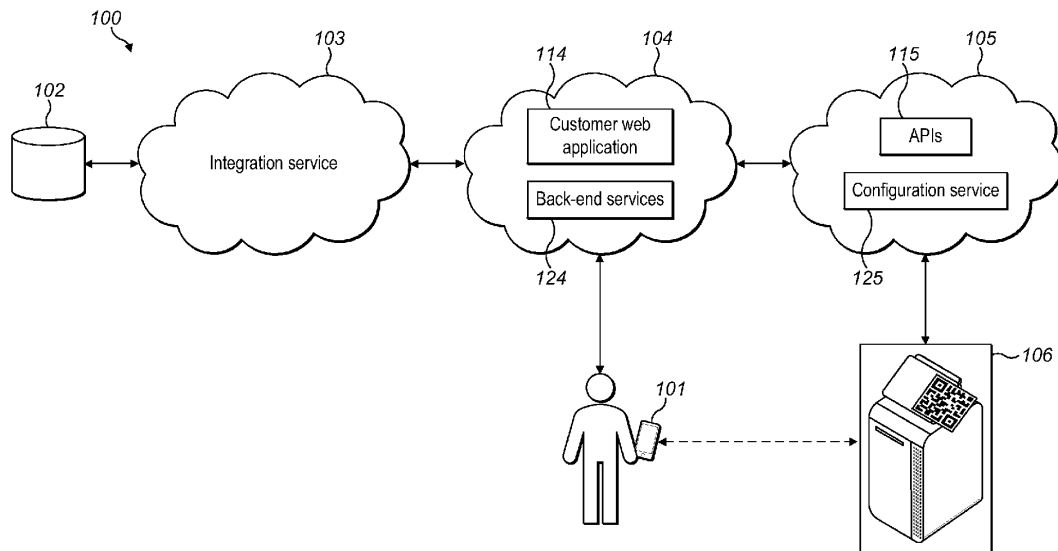

FIG. 1

(57) Abstract: There is provided a method and computer program product for enabling the connection between an application and a peripheral device. The method comprises using a location identifier to reserve the location of the peripheral device, and forming a connection between the application and the peripheral device at the reserved location. The connection defines a route for exchanging data between the application and the peripheral device via an application programming interface.
