(54) Title: METHOD, SYSTEM, AND COMPUTER PROGRAM PRODUCT FOR PROCESSING TRANSACTIONS USING ELECTRONIC WALLETS

FIG. 1

(57) Abstract: A computer-implemented method includes: storing, by a payment application, payment device data including: first and second payment device identifiers and first and second wallet identifiers corresponding to first and second electronic wallets in which first and second payment device credentials of first and second payment devices are respectively stored; initiating a payment transaction with a merchant system; displaying the first and second payment device identifiers; receiving a user input from the user of the user device, the user input comprising a selection of the first payment device identifier; determining that the first electronic wallet includes the first payment device credentials of the first payment device; and facilitating a transfer of payment data between the merchant system and the first electronic wallet to initiate processing of the payment transaction.
